-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 13, 17-20, 22 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. All of the above claims contain language of the following type, "wherein the device has one of element X or not X". This positive recitation of an element followed by a negative limitation of the same element renders the claim indefinite, because it is not clear which elements of the invention are necessary. Additionally, these claims are infinitely broad, because any other configuration, except the X configuration, can be considered "not X". For these reasons, it is impossible to address these claims on the merits. Please revise said claims so that essential elements are positively recited.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 12, 14-16, 21 rejected under 35 U.S.C. 102(b) as being anticipated by Pacella et al (Pacella). Pacella discloses a dishwasher comprising a bottom, top, and walls that collectively form an interior of the washing machine. Figure 7 shows a

spraying device comprising a channel 148 to guide washing liquid. The channel is integrated into at least the bottom of the interior 126. Openings 152 function as nozzles to spray fluid into the interior. The device includes a pump 140, which reads on mechanical means to control pressure. The device is believed to be capable of operating at various pressures, a feature which is regarded as intended use of the apparatus. The cross sections of 148 are rectangular with rounded edges. Removable plate 150 lies within the plane of the bottom, and can be considered a part of the bottom. The cover plate is fixed by means such as screws.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 6,869,029 to Ochoa, Sr. et al shows spray channels in the bottom and side walls that are attached with clipping means to elbows (figure 11). This structure is believed to anticipate spray channels that are integral with the bottom and side walls, made of tubing, and removable and fixable to different channels.
